REMAC Advisory

24-02

**Protocol
Correction**

Created
5/14/2024

PURPOSE

Correction of the Fever – Pediatric Protocol

BACKGROUND

A critical error has been found in the Collaborative Protocols that will go into effect 7/2024.

Protocol - Fever - Pediatric

Acetaminophen dosage should read 12.5mg/kg IV over 15 minutes.

The decimal is currently missing.

MEDICAL CONTROL CONSIDERATIONS

- Additional oral Acetaminophen³
- Additional Ibuprofen⁴
- Acetaminophen 125 mg/kg IV over 15 minutes^{†@3}

The State is working on rectifying this issue before the new protocols go into effect.
