

BEHAVIORAL HEALTH & SUBSTANCE USE DISORDER CONSIDERATIONS FOR EMS

The goal of this 8-hour course is to provide an overview of the causes of substance use disorder and common mental health illnesses as they relate to our patients, ourselves and our coworkers. The course will also examine the intersection of substance use disorder and mental health.

Communications tools and resources EMS providers can utilize will be featured.

The course concludes with a discussion on the mental health, wellness and resilience of EMS providers, building communication skills and providing resources providers can share or use. We must take care of ourselves so we can continue to care for others.

Attendance BOTH days is required

September

9TH

5:30pm-9:30pm

September

10TH

11am-3pm

**Finger Lakes Regional
